### Targus Versavu™ Keyboard and Case for iPad® 2

PRODUCT CODE: THZ084US

#### Product Description:

The Targus Versavu Keyboard and Case is specifically designed for the iPad 2. The sophisticated styling of the case features a unique, patent-pending mechanism that creatively frames the Apple logo and allows the iPad to rotate 360° from landscape to portrait mode.

The form-fitted design securely holds the iPad in place while the hard-sided exterior provides a sturdy, protective cover. The Versavu

Keyboard and Case includes a QWERTY, low-profile Bluetooth keyboard that provides tactile feedback to the user to improve typing accuracy and speed while maintaining a quiet typing experience. The keyboard is Bluetooth® and can be charged inside of the case for an easy-to-sync, cable-free user experience. Thoughtfully designed, the Versavu case includes a scratch-resistant frame around the keyboard to prevent the iPad from touching the keys when the case is closed and ready for transport.

The Versavu Keyboard and Case also includes an easy to locate, built-in holster for a pen or stylus. Featuring a soft interior lining to protect the iPad, Versavu provides full access to all iPad functions so the device is fully operational inside of the case. Pairing an executive appearance with seamless functionality, the Versavu Keyboard and Case for the iPad® 2 provides an attractive and functional way to carry and use the iPad.
